

Clearcreek Road Department

Monthly Report

November 2022

Road Crews spent the first several weeks of November identifying and repairing damaged asphalt throughout the township. Crews milled down raised spots three or four inches deep for most repairs. Occasionally, the damage required digging out asphalt, rebasing, and compacting the area with gravel before installing new asphalt.

With construction complete, crews moved into the newly built Equipment Storage Building. After organizing the space, crews began servicing the plow trucks in preparation for winter weather events.
