

Clearcreek Road Department

Monthly Report

November 2023

During November, the road department prepared salt equipment for the snow season. This included painting brine tank frames, hooking up snowplows and auger boxes, and inspecting beet heat and brine tanks.

Crews completed ditching on Mary Anne Drive and Hathaway Road. Additionally, crews repaired a sizable portion of roadway on Hemmingway Drive.

The dry weather allowed for the installation of a much-needed drainage pipe behind the Township Administration Building. As the overflow for the detention basin, this area experienced several washouts, which led to hazardous conditions.

Finally, crews replaced a 36" x 40' culvert pipe on East Pekin by Township Line Road.
