

Clearcreek Road Department

Monthly Report

November 2024

In November, crews focused on servicing plow trucks for readiness during winter snow events. The fleet consists of six dump trucks, five one-ton pickup trucks, a backhoe used for truck loading, and a skid loader with a pusher box for facility cleaning. Both crew and fleet are ready to clear and treat the 200+ lane miles of roadway throughout the township. Additional winter preparation included mixing 4,000 gallons of brine.

Mild temperatures allowed crews to complete an additional asphalt repair on Aspen Court before the cold set in at the end of the month.

Additionally, crews crack sealed all roads in Waynesboro Subdivision.

Throughout the month, work continued on sign inventory, inspection, and repairs. Crews also completed roadside and brush mowing.

Finally, crews began grading roads for paving in 2025.
